Seeking a 6-month end-of-studies internship – available from January 2027

LinkedIn

Profile

Final-year engineering student (Cybersecurity & Cloud Computing, ENSAM Casablanca, graduating July 2027). I design, deploy and test network and cloud security architectures: a FortiGate high-availability cluster with MFA authentication and SIEM monitoring, and an Azure detection pipeline that caught real attacks. Experience running IT operations in 24/7 production (200+ users) and in PCI DSS compliance. Fortinet and AWS certified.

Technical Skills

Network security: FortiGate (HA cluster), Cisco ASA, VLAN, OSPF, IPsec/SSL VPN, Zero Trust (NIST SP 800-207), Snort IDS/IPS, Wireshark

Detection & SIEM: Microsoft Sentinel (KQL, Logic Apps playbooks), Wazuh, MITRE ATT&CK, penetration testing with Kali Linux

Identity & access: Keycloak (OAuth2 / OpenID Connect), TOTP MFA, FreeRADIUS, Active Directory, GPO

Cloud & DevOps: Microsoft Azure (Log Analytics, Monitor Agent, RBAC), AWS (certified), Docker, Terraform, Ansible, Git, Linux Ubuntu/Debian, Bash

Development & compliance: Python, Java / Spring Boot / Spring Security (JWT, RBAC, OWASP Top 10), C++; PCI DSS v4.0, risk analysis (EBIOS RM), Moroccan law 09-08, GDPR, ISO 27001 (fundamentals)

Flagship Project – Zero Trust Network Architecture on Physical Hardware

Jun. – Sep. 2026 | Mövenpick Tangier (Accor Group), 84-page report, supervised by the IT Director

- **Design and deployment:** FortiGate 100E high-availability cluster, 3-VLAN segmentation, captive portal, Keycloak (TOTP MFA), FreeRADIUS bridged by a Python script, Wazuh with custom detection rules
- **Risk analysis:** 5 scored scenarios (EBIOS RM-inspired); after implementation and live attacks (Kali Linux), 4 of 5 risks drop to low level
- **Validation:** HA failover tested, unauthorised lateral flows blocked and alerted, mapped against PCI DSS, law 09-08 and GDPR

Professional Experience

IT Technician & End-of-Year Project — Jun. 2026 – Sep. 2026
Mövenpick Hotel & Casino Malabata (Accor Group) — *Tangier, Morocco*

- Ran IT infrastructure for 200+ users in 24/7 operations; incident resolution and coordination with vendors and technical teams

IT Supervisor Intern — Jul. 2025 – Sep. 2025
Mövenpick Hotel & Casino Malabata — *Tangier, Morocco*

- PCI DSS v4.0 compliance programme (gap analysis, remediation); automated database backup

IT Technician Intern — Aug. 2024 – Sep. 2024
Data Process — *Casablanca, Morocco*

- Deployed GLPI integrated with Active Directory; accounts, GPO, L1/L2 support

Network Security Intern — May 2024 – Jun. 2024
LNRN – GENIE Programme — *Rabat, Morocco*

- Snort IDS/IPS on Ubuntu and Cisco infrastructure (VLAN, OSPF, ASA); technical documentation

Other Projects

Azure SOC Lab (2026): Ubuntu → Azure Monitor Agent → Log Analytics → Sentinel, KQL rule and Logic Apps playbook; **6 real attacker IPs detected** within hours.
Secure Spring Boot applications (ENSAM): JWT, RBAC, CSRF protection, parameterised queries. **Crypto Trading Platform (C++):** capstone graded 98% (University of London).

Education, Certifications & Languages

Engineer's Degree, Cybersecurity & Cloud Computing – ENSAM Casablanca 2024 – 2027 (expected)
Associate's Degree(BTS), Computer Systems & Networks – Alfarabi High School, Salé 2022 – 2024
Certifications: Fortinet FortiGate 7.4 | FortiSASE | AWS Cloud Foundations | AWS Cloud Security | Cisco Network Tech.
Languages: Arabic (native) | French (C1) | English (B2)
