Seeking a 6-month end-of-studies internship (PFE) – from January 2027

Portfolio & projects

Profile

Final-year engineering student in Cybersecurity & Cloud Computing (ENSAM Casablanca, graduating July 2027). I design, deploy and test security architectures on real equipment: a FortiGate high-availability cluster with MFA and SIEM monitoring, and an Azure detection pipeline that caught real attacks. Experience running IT in 24/7 production (200+ users) and in PCI DSS compliance. Fortinet and AWS certified; all projects are on GitHub.

Technical Skills

Network security:	FortiGate (HA cluster, identity-based policies), Cisco ASA, VLAN/802.1Q, OSPF, IPsec/SSL VPN, Zero Trust (NIST SP 800-207), Snort IDS/IPS, Wireshark
Detection & SIEM:	Microsoft Sentinel (KQL, Logic Apps playbooks), Wazuh (custom rules), MITRE ATT&CK, ModSecurity/OWASP CRS, penetration testing with Kali Linux
Identity & access:	Keycloak (OAuth2 / OpenID Connect), TOTP MFA, FreeRADIUS, Active Directory, GPO
Cloud & DevOps:	Microsoft Azure (Log Analytics, Monitor Agent, NSG, RBAC, Defender for Cloud), AWS, Docker, Terraform, Ansible, Git, Linux, Bash
Development:	Python, Java / Spring Boot / Spring Security (JWT, RBAC, OWASP Top 10), SQL, C++
Compliance & risk:	PCI DSS v4.0, risk analysis (EBIOS RM), Moroccan law 09-08, GDPR, ISO 27001 (fundamentals)

Flagship Project – Zero Trust Network Architecture on Physical Hardware

Jun. – Sep. 2026 | Mövenpick Tangier (Accor Group) | 84-page report, supervised by the IT Director Code: GitHub

- **Design and deployment:** FortiGate 100E HA cluster (FGCP), 3-VLAN segmentation, captive portal, Keycloak (TOTP MFA), FreeRADIUS bridged by a Python module, Wazuh with custom rules mapped to MITRE ATT&CK.
- **Risk analysis:** 5 scored scenarios (EBIOS RM-inspired); after implementation and live attacks (Kali), 4 of 5 risks drop to low.
- **Validation:** HA failover tested; lateral movement blocked and alerted; mapped against PCI DSS, law 09-08 and GDPR.

Professional Experience

IT Technician & End-of-Year Project Jun. 2026 – Sep. 2026
Mövenpick Hotel & Casino Malabata (Accor Group) *Tangier, Morocco*

- Ran IT infrastructure for 200+ users in 24/7 operations; incident resolution, coordination with vendors and teams.

IT Supervisor Intern Jul. 2025 – Sep. 2025
Mövenpick Hotel & Casino Malabata *Tangier, Morocco*

- PCI DSS v4.0 compliance programme (gap analysis, remediation); automated database backups; RFID access control.

IT Technician Intern Aug. 2024 – Sep. 2024
Data Process *Casablanca, Morocco*

- Deployed GLPI integrated with Active Directory; managed accounts and GPOs; L1/L2 support.

Network Security Intern May 2024 – Jun. 2024
LNRN – GENIE Programme *Rabat, Morocco*

- Snort IDS/IPS on Ubuntu and Cisco infrastructure (VLAN, STP, OSPF, ASA policies); technical documentation.

Other Projects (code and evidence on GitHub)

Azure Cloud SOC Lab (2026, GitHub): Ubuntu VM → Monitor Agent → Log Analytics → Sentinel; KQL rule and Logic Apps playbook; **12+ real attacker IPs detected within hours**, then hardened.

WAF Under the Hood (2026, GitHub): custom Python WAF vs ModSecurity + OWASP CRS in front of DVWA, automated attack suite: **25/26 SQLi/XSS blocked (ModSecurity 23/26), 0 false positives**.

Multi-Tenant Lab Orchestrator (ENSAM, 2026, GitHub): Spring Boot / Spring Security API deploying isolated EVE-NG labs: JWT + refresh-token rotation, RBAC, per-user quotas, audit logs.

Crypto Trading Platform (C++, University of London): object-oriented capstone, graded **98%**.

Education, Certifications & Languages

Engineer's Degree, Cybersecurity & Cloud Computing – ENSAM Casablanca 2024 – 2027 (expected)
Associate's Degree (BTS), Computer Systems & Networks – Alfarabi High School, Salé 2022 – 2024

Certifications (Credly links): Fortinet FCP – SASE | FortiSASE & SD-WAN 7.6 Core Admin. | FortiGate 7.4 Administrator | AWS Cloud Foundations | AWS Cloud Security Foundations | Cisco Network Technician

Languages: Arabic (native) | French (C1) | English (B2)
